Experiment 4: Data Import and Basic Information Using Pandas

- Importing Pandas: import pandas as pd Imports the Pandas library, which is essential for data manipulation in Python.
- Applying various dataset functions to display/ describe our datasets

```
import io
import pandas as pd
from google.colab import files

upload = files.upload() #Uploads file and saves it to 'upload' variable

# Access the uploaded file using its actual name from the upload dictionary
file_name = list(upload.keys())[0] # Get the actual name of the uploaded file
df = pd.read_csv(io.BytesIO(upload[file_name]))
df.head(5)
```

 Choose Files No file chosen

Upload widget is only available when the cell has been executed in the current browser session. Please rerun this cell to enable.

Saving titanic.csv to titanic (1).csv
